DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Pelishek.

As per claim 1, Pelishek discloses first mounting plate (base 1), second plate (arm 5) with attached mercury bulb thermostat 9 and being relatively rotational about base plate 1, and means 16 for sensing humidity and adjusting the temperature setting accordingly (column 1, lines 16-19).

As per claims 2 and 3, Pelishek discloses means 16 being a helical spring which contracts and expands according to humidity (column 2, lines 18-35).

As per claims 4 and 5, Pelishek discloses hub 3a and slot 6.

As per claim 6, Pelishek discloses second plate rotating about the hub, supporting thermostat/mercury bubble 9, and having a second end attached thereto (Figures 1 and 2).

Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
